

# WATT'S UP?

theWattSpot.com

December 2007

## ARE YOU READY?

Are you ready for a high-mileage, low-emissions Toyota Prius Hybrid? Beginning in January, take the ComEd Residential Real Time Pricing Survey\* and you can be entered to win a 2009 Prius!

The Prius is changing the way we drive: It's the first highly successful – and popular – hybrid vehicle to hit the road. Maybe you've heard about the recent US legislation that mandates all vehicles must attain an average of 35 miles per gallon in 2020. Well, the Prius is already there! With a combined city/highway average of 46 miles per gallon – using both a small gasoline engine and advanced battery power – the Prius is a great-riding, great-looking option for today's energy-conscious driver.

## FIVE EASY QUESTIONS

All you'll have to do is answer Five Easy Questions in the ComEd Residential Real-Time Pricing Survey, and you will be able to enter the Great Prius Giveaway! You'll also learn tips on how Real-Time Pricing helps you take better control of your energy costs.

My best wishes to you for a Happy and Healthy New Year!

Sincerely,  
Katie Papadimitriou  
ComEd RRTP Program Manager
